Forest Health: An Integrated Perspective

By A. Mann

Cambridge University Press. Paperback. Book Condition: New. Paperback. 388 pages. Dimensions: 8.9in. x 6.0in. x 1.2in.The first edition of this book was the indispensable reference for researchers in the theory of pro-p groups. In this second edition the presentation has been improved and important new material has been added. The first part of the book is group-theoretic. It develops the theory of pro-p groups of finite rank, starting from first principles and using elementary methods. Part II introduces p-adic analytic groups: by taking advantage of the theory developed in Part I, it is possible to define these, and derive all the main results of p-adic Lie theory, without having to develop any sophisticated analytic machinery. Part III, consisting of new material, takes the theory further. Among those topics discussed are the theory of pro-p groups of finite coclass, the dimension subgroup series, and its associated graded Lie algebra. The final chapter sketches a theory of analytic groups over pro-p rings other than the p-adic integers. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN.
