TIME RESOLUTION OF COLLAPSE EVENTS DURING THE PROPAGATION OF ULTRAVIOLET LIGHT FILAMENTS

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x7 mm. This item is printed on demand - Print on Demand Neuware - Long distance propagation, or filamentation, of short, intense laser pulses is possible through the balance of two effects: self-focusing, when a nonlinear index of refraction of air is induced by high intensities, and de-focusing, due to the plasma created by the pulse. Applications for filamentation include areas such as remote sensing and directed energy. A split-step spectral propagation...

Reviews

A new e book with an all new point of view. Better then never, though i am quite late in start reading this one. I am just quickly will get a satisfaction of reading a written publication.

-- **Ms. Teagan Quitzon DVM**

Comprehensive guideline! Its this kind of great go through. it had been writtern really properly and beneficial. I discovered this publication from my dad and i recommended this book to discover.

-- **Constance Considine IV**

This pdf is so gripping and exciting. It can be full of knowledge and wisdom I am just effortlessly could get a enjoyment of reading a published pdf.
