CARVIREN CASE OF STUDY: AN EXPERIMEDIA EXPERIMENT

DOWNLOAD

Createspace, United States, 2014. Paperback. Book Condition: New. 234 x 156 mm. Language: English . Brand New Book ***** Print on Demand *****.What is this case of Study about? This case of study reports on the design, development, implementation, execution and evaluation of the EXPERIMEDIA experiment for CAR VIRTUAL ENVIRONMENT (CARVIREN), which focuses on a network for the CAR of Sant Cugat Venue; where information about the workouts of Biathlon, Pommel Horse and Trampoline are available to the users using a website. Workout data is collected by WIMU, developed by RealTrack Systems. WIMU is a device for the monitoring and measure of the movement, has more than 20 sensors inside and it can be used in conjunction with other external sensors. Thanks to its process capacity and reduced size, WIMU can be part of the fixed installation of the CAR Venue or become a Mobile Transmission Unit; able to collect, process and send data outside the Venue (with or without Internet access). Training records are saved at CAR in a database. The raw data get processed by a data processor server, converting it into elaborated information. This information is displayed using sports widgets. These widgets (also called Sportwis) offer relevant information to help coaches and athletes in their path for performance improvement. Thanks to this integration of Baseline Components, external sensors, sport widgets and WIMU, the user can access a whole new experience in trainings methodology. What s Experimedia? EXPERIMEDIA is a collaborative project aiming to accelerate research, development and exploitation of innovative Future Media Internet products and services through testbeds that support experimentation in the real world which explore new forms of social interaction and experience in online and real world communities. EXPERIMEDIA develops and operates a unique facility that offers researchers what they need for Future Media Internet...
