OF American Microscopical Society (Published in Quarterly Instalments) Vol. XXXVIII APRIL, 1919 No. 2 CAMALLANUS AMERICANUS, nov. spec. , A Monograph On A Nematode Species. By Thomas Byrd Magath I. INTRODUCTION It is as lamentable as interesting that a group of animals presenting so many unusual and important objects of investigation as do the nematodes, should have received so little attention from a general morphological point of view, despite the fact that they have been studied from so many other angles. It is for this reason that systematic studies upon the Nematoda have been so unsatisfactory in the past. With the hope that a very detailed study of the morphology of this group will throw some light on the present chaotic situation, the author has undertaken the study of a single species to find out its precise structure. This work has been done with the...
